

YUKO FORMA 10 (ISO 10)

Form-lubricating fluid.

Description

Used for lubrication of forms in production of reinforced concrete, concrete, foam concrete and gas concrete products.

Intended for production of products with increased quality requirements to the finished products and their surface, as well as for form-lubrication during monolithic construction.

The product does not require pre-mixing. Delivered ready for use.

Enabled packing

 Canister 17,5kg

 Barrel 180kg

 In bulk

Benefits

- Allow to get products with high requirements to wares surface, without stains and bleached areas;
- Extends the service life of wooden or plastic-coated forms;
- Does not corrode metal moulds;
- Efficient consumption;
- Universal product for manual as well as for automatic application.

Compliance

ISO 10 |

Typical characteristics

Kinematic viscosity at 40°C, mm ² /s	10
Acid index, mg KOH/g	8.1
Flash point in open crucible, °C	90
Pour point, °C	-10

Temperature range

Produced according to TU U 23.2-31852954-042:2008. This information is reference and it can be changed without a notice. This article is from 01/11/2015, it replaces all the early published descriptions of the product.
