

YUKO I 460PV (ISO 460)

Oil for film-lubrication bearings of the rolling mills.

Description

Intended for lubrication of film-lubrication bearings of the rolling mills, used at ironworks, steelworks, tyre works and other plants, where oils for lubrication of film-lubrication bearings are used.

Produced of high-quality solvent-refined base oils with modern additives.

Enabled packing

 Barrel 200L

 In bulk

Benefits

- It is the main oil type for lubrication of film-lubrication bearings;
- High demulsifying properties allow using the oil even when watered;
- Allows to increase rolling mill yield and film-lubrication bearing service life.

Compliance

ISO 460 |

Typical characteristics

Kinematic viscosity at 100°C, mm ² /s	28.0
Viscosity index	92
Acid index, mg KOH/g	0.5
Flash point in open crucible, °C	250
Pour point, °C	-10

Temperature range

Produced according to TU U 23.2-31852954-012-2003. This information is reference and it can be changed without a notice. This article is from 01/09/2014, it replaces all the early published descriptions of the product.
