

YUKO T-30 (ISO 46)

Turbine oil.

Description

Turbine oil of acid-land purification, which is used for lubrication of bearings and auxiliary mechanisms of turbine units (steam and gas turbines, turbocompressor machines, hydraulic turbines), as well as for working in the regulation systems of these machines as hydraulic fluid.

Oil T-30 is used for hydraulic turbines, low-speed steam turbines, turbo and centrifugal compressors, which work with high-speed loaded gearboxes.

Enabled packing

 Barrel 200L

 In bulk

Benefits

- Increased stability against oxidation allows prolonging the service life of process equipment;
- Good demulsifying properties allow oil operation even in flood conditions;
- Improved operational safety due to reduced volatility of oil components;
- Manufactured according to GOST.

Compliance

ISO 46 |

Typical characteristics

Kinematic viscosity at 50°C, mm ² /s	28-32
Density at 20°C, kg/m ³	900
Viscosity index, min	70
Acid index, mg KOH/g, max	0.02
Flash point in open crucible, °C, min	180
Pour point, °C	-10

Temperature range

Produced according to GOST 32-74. This information is reference and it can be changed without a notice.
