

YUKO TOSOL A-40

Premixed premium engine coolant.

Description

Premixed ready for use low freezing coolant. Developed for filling the cooling systems of all types (including aluminum): cars and trucks, buses, agricultural, construction and other specialized machinery, stationary engines.

Made of monoethylene glycol and BASF additives. Applied according to the OEM instructions.

Properties: engine cooling, protection of the cooling system against freezing, overheating and corrosion, compatible with rubber parts.

Enabled packing

 Canister 5kg

 Canister 10kg

 Barrel 215kg

Benefits

- Prevents engine overheating and freezing;
- Effectively lubricates functional surface;
- Cleans and restores cooling channels;
- Protects against chemical corrosion;
- Extends the service life of the cooling system.

Compliance

Typical characteristics

Density at 20°C, g/cm ³	1,060
Corrosive effect on metals, g/v2 day	stands
Pour point, °C	-39

Temperature range

Produced and packaged according to TU U 20.5-31852954-096: 2017, TU U 20.5-31852954-057: 2013. This information is reference and it can be changed without a notice.
